

Enterprise-wide markup and collaboration.

The optional Brava!® Markup Module integrates Brava! Enterprise with Document Locator. This integration adds a comprehensive set of viewing and markup tools to facilitate enterprise-wide collaboration that can also be extended to vendors and customers. The Brava! Markup Module:

- Facilitates collaboration in project environments where multiple people need to view and mark up shared documents.
- Enables viewing and markup of over 200 file types without the need for the native software.
- Provides a comprehensive set of viewing and markup tools, plus printing and publishing features.

Secure, flexible collaboration in a managed environment.

Integration with the WebTools and WebView modules makes it possible for project teams to work on documents together throughout all project phases, from creation and revision to review and approval.

- Share files over an intranet and/or extranet without the risk of files being transferred, captured, or edited for unauthorized purposes.
- Provides robust concurrent usage. Server-based application gives improved performance with large documents such as CAD files.
- Submit marked-up drawings for review and approval, and send notification messages to team members, all via the Web.
- Check in and check out project documents via the Web.
- Control the degree of collaboration according to need: full markup and publish capabilities for people working on the documents, or view-only access for those who only need to view files.
- Protect original documents. Markups are saved as separate XML overlays, so the original document is never touched.
- Burn in markups (including redaction areas) at publishing time for easy, secure distribution.

View over 200 document formats from one application.

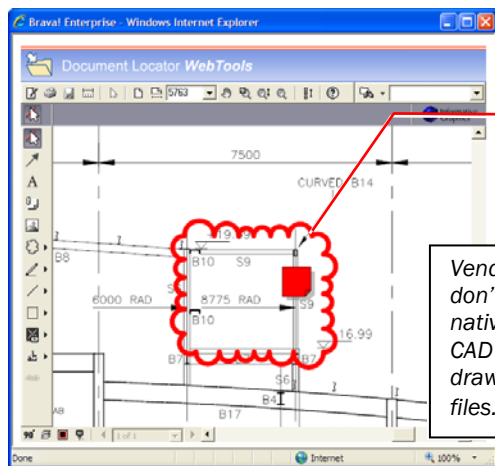

Brava! enables you to use a single application to view and mark up over 200 document types from different applications, including AutoCAD design files and most image files. Supported formats for the Brava! viewer include Word, Excel, AutoCAD, Visio, and 45 EDA\ECAD\PCB formats, as well as published, scanned, or print-captured formats like TIFF, PDF, DWF, and CSF. With Brava!, you can easily view, mark up, and print all these formats and more without the native software.

Benefits

- **Enterprise markup solution** – View, mark up, and print over 200 different document formats directly from your repository without the native file application.
- **Secure, flexible collaboration** – Mark up and share documents with overlays while preserving the original document. Provide Web access according to the level needed: full Brava! for markup and publishing, or view-only.
- **Secure redaction** – Redact selected portions of any document to keep information confidential. Publish any document to CSF format for Visual Rights™ persistent security controls.

Solutions

- **Regulatory compliance** – Maintain control by preserving original document during markup activity, and use redaction to meet HIPAA and other confidentiality requirements.
- **Collaboration** – Share secure documents with others and eliminate the risk of unauthorized sharing or modification of published documents.

Securely mark up and share CAD drawings via the Web.

Vendors and customers don't need to have the native software to view CAD files and other drawing and design files.

Related Features

- **Automated Workflow** – Automate your business processes.*
- **Document Approval** – Automate your document approval processes.
- **Notification Subscriptions** – Receive a notification when a subscribed to event occurs.
- **Records Management** – Ensure compliance with government and industry regulations.
- **Searching** – Create and save custom searches to instantly locate documents.
- **Security and Auditing** – Protect your documents from unauthorized access and alteration.
- **Version Control** – Preserve all draft information and make sure you are working with the most current version of a document.
- **Web Access** – Provide secure access to repositories via the Web.*

View and navigation features include:

- Dynamic Zoom/Pan and magnifier view controls /Rotate and mirror
- Layer controls
- Text search and copy to clipboard
- True Color support and scale to gray
- XREF/Reference file support
- Hyperlink to other documents
- Page thumbnails

Markup and review features include:

- Markup burn-in/markup overlay for review/Markup Exists indicator
- Visually compare two files showing differences
- Author name/date/time stamps
- Save as DXF
- Undo/Redo, cut/paste
- Snap to drawing surfaces/ geometry snap measurement tools
- Auto-scaled calibration
- Precision control
- Adjustable line style and width
- Changemarks® next button review
- Measurement takeoff counts
- Lines, polygon and cloud shapes
- Redaction (hide document areas) with optional password protection

Print features include:

- Printing honors redaction areas
- AutoCAD line weight support
- Thumbnail print preview
- Configurable ISO banners and watermark
- Print current view/page range/print to scale (US Customary/Metric)

Publish.

Publish any viewable file to PDF or to Informative Graphics' CSF format with Visual Rights™ security controls. Quickly share content with anyone anywhere using a highly-compressed, 256-bit encrypted format. Recipients of CSF files can view them using Brava! Desktop or the free Brava! Reader. Features include:

- Password protection
- File expiration date
- On-screen and print banners
- Feature restrictions (e.g., disallow print, markup, measure)

You can also save the current view as a .JPG file.
