FOR IMMEDIATE RELEASE

COLUMBIASOFT IS MICROSOFT FRONT RUNNER FOR WINDOWS 7® AND WINDOWS SERVER® 2008 R2 COMPATIBLE DOCUMENT MANAGEMENT SYSTEM

The company is recognized as an early-adopter for its integration of the Document Locator® document management software with the next generation of Microsoft Windows and Server software.

Portland, Oregon – September 9, 2009 – ColumbiaSoft has been named a Microsoft Front Runner for Microsoft Windows 7 and Microsoft Windows Server 2008 R2. The document management company plans to release its next version of the Document Locator document management system, which is compatible with Windows 7 and Windows Server 2008 R2, in mid-September ahead of Microsoft's release of the next generation of their Windows and Windows Server software.

"Being a Front Runner helps speed our development so we can deliver innovative releases to the market faster," said ColumbiaSoft executive vice president of worldwide sales and marketing, David Pogue. "Our connection with Microsoft through the Front Runner program is an advantage that allows us to lead the market with document management solutions that offer all the benefits of the most current technology."

The Front Runner program is designed to assist and recognize Microsoft Independent Software Vendors (ISVs) like ColumbiaSoft who are early-adopters and are developing on the very latest Microsoft technologies.

ColumbiaSoft's team of software engineers developed and tested the next version of Document Locator, version 5.3, using access to software development kits and early Release Candidate versions of Microsoft's software months ahead of general release dates. This allowed ColumbiaSoft to complete development of its next generation of document management software early and prepare for a release date in mid-September, about a month in advance of Microsoft's expected release of Windows 7 and Windows Server 2008.

Document Locator is a Windows document management system that integrates with the most common business applications used by people on a daily basis, simplifying the management and collaboration of information across the workforce. Version 5.3 will be compatible with both the 32-bit and 64-bit versions of Windows 7 and Windows Server 2008 R2.

About ColumbiaSoft Corporation

ColumbiaSoft is a leader in document management solutions designed to enhance efficiency, reduce risk and improve collaboration. Information workers use ColumbiaSoft software to manage and share paper and electronic documents, e-mail, faxes, and other electronic files to save costs, increase productivity, automate business processes, and meet compliance requirements. ColumbiaSoft is a Microsoft Gold Certified Partner and an Autodesk Authorized Developer. The company's products are fully integrated into popular applications such as Microsoft Windows, Office, Outlook, SharePoint, Adobe Acrobat, AutoCAD, and more. ColumbiaSoft is a privately held company based in Portland, Oregon and was founded in 1998. For more information, visit http://www.documentlocator.com.
