

**COLUMBIASOFT RELEASES NEW VERSION OF ITS DOCUMENT MANAGEMENT SOFTWARE, DOCUMENT LOCATOR<sup>®</sup>, COMPATIBLE WITH MICROSOFT WINDOWS 7<sup>®</sup>**

*Document Locator version 5.3 will be available in mid-September 2009, and will work with Microsoft Windows 7 and Microsoft Windows Server 2008 R2.*

**Portland, Ore. – Sept. 2, 2009** – ColumbiaSoft today announced it will launch a new version of its application, Document Locator, which works with Microsoft Windows<sup>®</sup> 7 and Microsoft Windows Server<sup>®</sup> 2008 R2 to offer customers enhanced security, as well as innovative user interface features and reliability improvements. Document Locator is a paperless document management software system for businesses that is tightly-integrated with Microsoft operating systems and applications, making it easy for people to manage, store, control, and share documents and information.

“Our ISV community is alive with innovation, and we’re committed to helping our partners drive the next generation of software experiences,” said Ross Brown, Vice President of ISV and Solutions Partners for the Worldwide Partner Group at Microsoft. “Adding compatibility for the latest Microsoft operating systems helps ISVs to stay ahead of the competition and give their customers access to cutting-edge technologies.”

“ColumbiaSoft is excited to launch this new version of Document Locator,” said David Pogue, executive vice president of worldwide sales and marketing at ColumbiaSoft. “Making our application compatible with Microsoft Windows 7 and Microsoft Windows Server 2008 R2 helps us offer our customers compelling benefits, including improved security and reliability features, full support for multi-core processing, sophisticated management features, and flexible access administration to improve mobile working.”

Document Locator version 5.3 is designed to work with both the 32-bit and the 64-bit versions of Microsoft Windows 7 and Windows Server 2008 R2. Integration with Microsoft Windows and Microsoft Office applications, including Outlook, allows users to manage electronic files, emails, faxes, and scanned paper documents while remaining in the familiar applications they already use on a daily basis. This integration speeds user-adoption and lowers training requirements, making the

system easier and faster to deploy across the workforce. The system includes document version control, workflow, scanning, email management and archiving, document delivery, records management, an optional web interface for remote access, and more.

### **About ColumbiaSoft Corporation**

ColumbiaSoft is a leader in document management solutions designed to enhance efficiency, reduce risk and improve collaboration.
