

Advantages of Hosting

Eight Benefits of Hosting Document Locator Online

Server Management

A dedicated team of ColumbiaSoft personnel trained in maintaining and supporting your Document Locator system manages backend systems and hardware.

Datacenter

Redundant datacenter architecture including multiple power sources, redundant data drives and internet, advanced cooling systems and physical security measures.

Server Licensing

All Document Locator Server, Microsoft Server, and Microsoft SQL Server licensing is included.

Secure

Mirrored and encrypted disk drives, encrypted network communications with 3rd party SSL certificates, and database encryption.

SOC 2 Compliant

SOC 2 Type II certified, including system hardening, vulnerability testing, and system auditing.

Monitoring

System monitoring including SIEM, Microsoft Defender, NSG, firewall, and malware protection.

System Updates

Patch management of Microsoft and Document Locator Server software.

Backups

Four week database backup utilizing full, incremental, and transaction log backups via Azure Recovery Vault. Secondary backup for disaster recovery.
