

### Streamline markup and review sessions

Meet project deadlines faster and reduce the chances of errors caused by manual steps in review sessions using the optional **Bluebeam Connector for Document Locator**. A seamless connection allows project teams to review, markup, and collaborate on the same documents at the same time in the cloud. Review cycles are automated, saving your team's time and eliminating confusion. A history of markups is captured in Document Locator as part of the project record, giving you a complete view of the entire review process.

### Send files for review in Bluebeam Studio Sessions

The Bluebeam Connector adds a workflow in Document Locator that allows users to send files to your Bluebeam Studio cloud account. A review session is opened and project team members are alerted via email that a session has started. Team members can markup and collaborate on documents simultaneously in the cloud. Once the review session is complete, a new version of the file is saved in Document Locator to capture a history of the mark-ups.

- Adds a Bluebeam Studio Connector step option to Document Locator workflow
- Sends files to your Bluebeam Studio account and opens a review session
- Alerts reviewers by email that a review session has started
- Facilitates multi-user parallel markup
- Automatically captures mark-ups as new versions in Document Locator

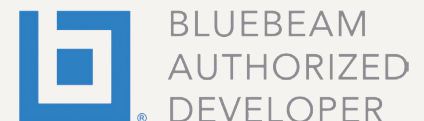

Collaborate in the cloud with the Document Locator Bluebeam Studio Connector.

### Benefits

- Automate review processes by eliminating manual tasks from review cycles.
- Review, mark up, and collaborate on the same document at the same time.
- Capture a complete record of the review process.

### Solutions

- Project document management
- Engineering and construction document management
- Markup and collaboration
- Version control

## Specialized for project document management

The Document Locator Bluebeam Connector is one of several components in a complete project document management solution that also includes project folders, submittals and transmittals, email management, and more.

Bluebeam is the AECO industry's leading project efficiency and collaboration solution. Architects, engineers, contractors and owners worldwide use Bluebeam Studio for real-time review, markup and collaboration on files. The Document Locator Bluebeam Connector streamlines this process, ensuring that a full and complete record of the review process is captured.

## Works with your Bluebeam Studio Session

A Bluebeam subscription (sold separately by Bluebeam) is required to use the optional Document Locator Bluebeam Connector. If you already have a Bluebeam account, or are interested in learning more about the Document Locator Connector, please Contact Us.

## Related Features

- **Document Workflow**  
Automate business processes.
- **Version Control**  
Automatically capture versions of documents, drawings, and other files.
- **Review and Approval**  
Route files for electronic reviews and approvals.
- **Document check-in and check-out**  
Shows if a document is being worked on by others.
