

Access files on the go using mobile devices and tablets wherever your work takes you.

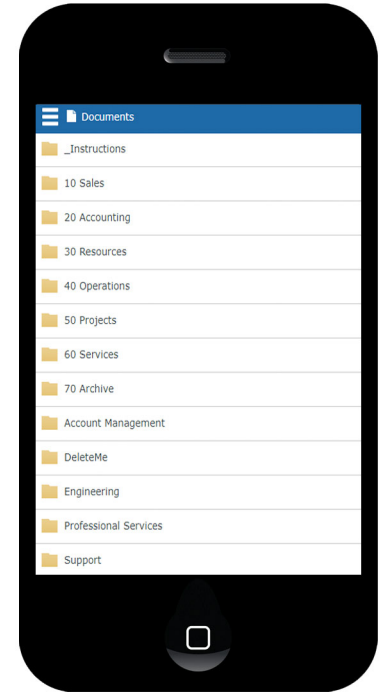

Document Locator Mobile extends the reach of files in your document management system worldwide among users of mobile devices and tablets.

- The Mobile Web interface is included with WebTools Web access.
- Developed using HTML5 technology, DL Mobile supports access on most mobile and tablet systems, including iPhone, iPad, Android, Windows Phone, and BlackBerry devices.
- Self-hosted, you provide secure access to on-site document management systems.

Put your office online for Mobile users

Employees, vendors, customers, and anyone authorized can work on the road while accessing files and performing certain collaborative steps using the mobile interface.

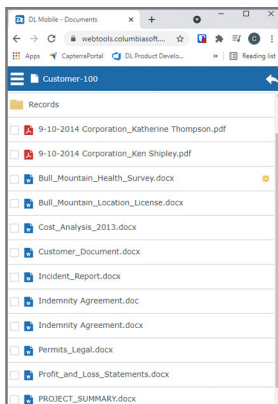

- Open and view files
- Search file content and use saved searches
- Send and receive notifications
- Participate in workflows

Document Locator Mobile extends access to users on many popular mobiles devices.
